

Mayank Shukla

Full Stack Developer | Senior Software Engineer

+91 7309261819 | msmayank555@gmail.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript, HTML, CSS, JSON, XML
- **Backend:** Python, Flask, FastAPI, Django, Django REST Framework (DRF) & Django ORM
- **Databases:** MySQL [certified by NPTEL IIT Kharagpur], PostgreSQL, ChromaDB (Vector Database)
- **Search & AI:** Semantic Search, Vector Embeddings
- **Architecture & Concepts:** Microservices, Event-Driven Architecture, Distributed Systems, REST APIs, Async Processing, Object Oriented Programming (OOP), Agile (Scrum)
- **Cloud & DevOps:** Microsoft Azure Certified [AZ-104, AZ-900], Azure Service Bus, Azure Functions, Azure Tables Storage, Azure Blob Storage, Docker, Kubernetes, CI/CD
- **Tools & Platforms:** Git, GitHub, Seq

EXPERIENCE

Software Engineer | Bold Technology Systems (Product Company) | Jan 2025 – Mar 2026

- Engineered a **scalable, full-stack, event-driven job application system** using React.js, JavaScript, Python, and Django, building responsive frontend interfaces and backend services, **supporting 10K+ monthly users with a 90% submission success rate**.
- Applied semantic search techniques using ChromaDB vector embeddings, **indexing 35K+ records** to match user profiles with job application questions **in under 1.2 seconds**.
- Developed a scalable question bank for **1M+ job applications** and optimized response performance using caching and hashing, **supporting 2K+ concurrent users** and **reducing response time from ~15 min to under 5 sec**.
- Built **REST APIs and a hybrid routing pipeline with automated human fallback**, processing **500+ Azure Service Bus messages daily**, and ensuring reliable job submission across distributed services with a **95% success rate**.
- Implemented an operational feedback workflow using structured logging, Slack alerts, and Jira ticketing to support **100+ concurrent workers** in a multithreaded environment, improving production incident detection and debugging **efficiency by 30%**.

Tech Stack: React.js, JavaScript, Python, Django, Asyncio, REST APIs, Azure Service Bus, Azure Functions, MongoDB, PostgreSQL, ChromaDB, Redis, Docker, Kubernetes.

Full Stack Software Engineer | TATA Consultancy Services | Jan 2021 – Jan 2025

- Designed user-friendly web applications using React.js, JavaScript, Python, Django, and FastAPI, delivering **20+ websites** to clients across **10+ countries**.
- Upgraded a Python-based service request processing system that **reduced record update time from 7 minutes to 30 seconds**, saving 214+ manual hours and **\$5,792 annually**.
- Collaborated across SDLC phases in an Agile environment, **delivering 100% on-time** releases with **zero post-production issues**; contributed to architecture improvements and managed CI/CD deployments across DEV, STAGE, UAT, and PROD.
- Promoted to the elite **TCS Digital Cadre (top 3% of associates)** and recognized as **Hi-Talent** for exceptional delivery of enterprise applications to globally distributed clients.

Tech Stack: Python, Django, FastAPI, Flask, RESTful APIs, MySQL, Microsoft Azure, CI/CD, React.js, Agile (Scrum)

PROJECT

VisionForge: AI-Powered Image Retrieval, Generation & Web Intelligence Platform

- A full-stack, CRUD-based Progressive Web Application (PWA) built using Python, FastAPI, and React, designed to be fully downloadable and compatible with any standards-compliant browser, including desktop and mobile devices such as Android and iOS.
- Implemented evaluation of Core Web Vitals, metadata accuracy, asset and vulnerability identification (e.g., videos, images, alt tags), bulk image compression with API integration, and 404 broken link detection.
- Built an AI-based image generation system using a retrieval-augmented generation (RAG) approach, combining embedding-driven semantic search (via Cosine Similarity) with generative AI (GenAI) models to create or retrieve images based on user prompts.

EDUCATION

B.Tech in Computer Science | Dr. APJ Abdul Kalam Technical University | Aug 2016 – Sep 2020
